## Experience

### 2021 - Present

DCPDC

#### Front-End Developer Analyst

Joined the company for their Front-End developer team that handles, builds, and customizes components for multiple clients. I am usually part of the front-end team and focused mainly in applying the UI style based on the client's UX design. I have also been a part of a project where I have to utilize my skills in database querying.

### 2021-2021

Freelance

#### Shopify Developer

Worked with multiple freelance clients from the UK, Italy, France, and the Philippines where he handled most of the client's Shopify store build, customization, integration, and content management.

### 2020 - 2021

GDEC

#### Web Developer

Part of the E-commerce and marketing team where I handled mostly the company's partners Shopify stores. I mainly build and customize the Shopify stores, connects warehouse, discount app, and payment integrations. I also collaborate with the client's ideas and needs for updating and improving the store. I also handle its site page optimization.

### 2016 - 2020

Talapoint Software Solutions

#### System support

I was hired as a system support for the company's Accounting software. I was tasked to communicate with the customers' concerns and requests for the software. I also handled the improvement of the systems design flow and user experience.
